Work description.

Inspector(s): Victor Altamirano

Date: 091613

Location: West of OTD building test area & Warehouse

Weather: Partly cloudy / 70 degrees

Field Work

Periodically throughout the day I visited the yard and warehouse at Pier 7 to see if any related Rod work was being conducted. I would also verify if any new material had arrived given that the Test Rigs 5 through 11 was expected today. I did not see any test rigs arrive today but did find a temporary rod of about 16' and two 2.5 inch couplers outside the warehouse. I notified B. Brignano of the new material and he pulled the orange tag later in the day from the coupler to keep in the Departments records.

Office Work

Wrote my diary of Friday's work, reviewed test rig plans and worked on finding information for Thursday's Safety presentation.

Workers

Iron Workers: None

Laborer: None

ABF : None

V. Altamirano Work Hours: 8 hours total.
